

CYBER RANGE AS A SERVICE

ONLINE LEARNING, TRAINING AND EXPERIMENTATION PLATFORM

Accessible via a simple web browser and with no other dependency, HNS ONLINE makes it possible to learn and train with real life and on demand scenarios. Based on HNS PLATFORM, our virtualization and simulation solution, HNS ONLINE makes it possible to widely spread cyber technical contents for a wide variety of users and uses. You will perform hands-on exercises and you will also be able to build your own contents.

With HNS ONLINE, forget slides and video tutorials: come play and challenge yourself with virtual machines and representative architectures, this all being done remotely and in a simple browser.

DESIGNED FOR

- › Learning
 - › Modules
 - › Paths
 - › Specific contents
 - › Learners evaluation
- › Training
 - › Cyber crisis management exercises
 - › Capture The Flag « Attack/Defense »
- › Testing and technical animations
 - › Experimentations and tests on architectures or components
 - › Allow your clients to test your products

THINK LIKE A CYBER MOOC UNDER STEROID !

- › No installation, no dependency
- › Online access to virtual machines and architectures
- › HTML5 web client and integrated remote screen
- › Secured connection («A» Grade on Mozilla Observatory)
- › Hashed and salted passwords

DIFFERENT DEPLOYMENTS ARE POSSIBLE

- › On our infrastructure (mutualized or dedicated):
 - › For individual users and structures as well (companies, schools, ...)
 - › Ability to create private learning spaces
 - › Ability to create specific contents on demand
- › You can choose to share the common infrastructure or to have your own dedicated infrastructure
- › You can follow the advancement of your users
- › We ensure maintenance and preserve operational security
- › On your infrastructure:
 - › We deploy our HNS ONLINE solution on your servers
 - › You have control over the whole platform and over your users
- › Co-branding:
 - › Creation of an environment that fits your image. Available for deployments on our dedicated servers or on your own infrastructure
